

**Luis Alberto Antonio Narcizo**

**QA ENGINEER | AI PRODUCT VALIDATION | AUTOMOTIVE HIL**

Phone: 5584577590

Email: narcizo1516@gmail.com

Location: Miguel Hidalgo, Mexico City, Mexico

Languages: Spanish native | English technical communication

Target roles: QA Analyst, QA Engineer, Manual QA, AI QA Tester

## **PROFESSIONAL PROFILE**

QA professional with Electronics Engineering background and experience in functional testing, regression execution, AI-assisted product validation, evidence documentation, defect analysis, and QA knowledge organization.

## **VALUE PROPOSITION**

Manual QA execution, AI behavior validation, structured documentation, engineering reasoning, and visual communication to improve product quality and reduce ambiguity.

## **CORE QA STRENGTHS**

Functional QA | Regression Testing | AI Product Validation | Google Ads Workflow Testing | QA Documentation | Traceability

## CURRENT PROFESSIONAL EXPERIENCE

QA Tester / AI Product Validation - Google Ads Ecosystem

Google-related project | Current role | 2024 - Present

- Execute manual functional tests and regression scenarios for digital advertising workflows and user-facing assistant behavior.
- Validate Search, Performance Max, Demand Gen, Ad Strength, Smart Bidding, budgets, targeting, keywords, assets, and campaign recommendations.
- Analyze expected behavior vs actual behavior and classify outcomes as pass, fail, partial pass, blocked, or requiring review.
- Evaluate AI-assisted flows for conversational quality, usefulness, criteria adherence, contextual consistency, and recommendation safety.
- Document defects with reproduction steps, visual evidence, impact explanation, and severity-oriented reasoning.
- Support stability through recurring regression checks, scenario re-execution, and validation of fixes.

## PUBLIC QA SCOPE

Product areas: Marketing Advisor workflows, Connect Sales validation, Google Ads user journeys, campaign recommendation flows.

Validation types: manual functional testing, regression testing, conversational AI validation, and risk-based review.

## PREVIOUS PROFESSIONAL EXPERIENCE

QA / Validation Engineer - Automotive HIL Environment

Ford GTBC-related automotive validation experience | Previous role

- Participated in automotive validation involving HIL environments, component-level testing, and requirements-based verification.
- Worked with validation logic related to IPC, signal behavior, temperature units, indicators, simulated inputs, and test evidence generation.
- Supported test execution, issue identification, evidence recording, and communication of abnormal behavior to technical stakeholders.
- Applied engineering reasoning to verify expected system behavior under controlled test scenarios.

Engineering, Warranty and Customer Support Roles

Termiz / Cleaver Brooks | Previous experience

- Supported technical follow-up, documentation, and customer-oriented resolution for industrial systems.

## QA DOCUMENTATION PROJECTS

Interactive QA Knowledge Platform | Test Execution Reports | Risk and Traceability

Material

## EDUCATION AND TECHNICAL TRAINING

Bachelor's Degree in Electronics Engineering

Universidad Autonoma Metropolitana (UAM), Mexico.

Technical Computer Science Background

Colegio de Estudios Cientificos y Tecnologicos del Estado de Veracruz, Plantel Tres Valles.

## CERTIFICATIONS, COURSES AND TRAINING

ISTQB Certified Tester Foundation Level (CTFL)

Advanced Test Automation and API Testing specializations - in progress

Software testing foundations, test design, defect analysis, and regression practices

Python, Java, JavaScript, HTML/CSS, Selenium, Playwright, Node.js, Git, CI/CD concepts,

Jenkins, Maven, JUnit, TestNG

DSPACE 5.8 user-level training, Cloud Computing, Business Intelligence, Swift training by Big Nerd Ranch

## TOOLS AND TECHNOLOGIES

Jira | TestRail | MATLAB | DSPACE | CircuitLab | Eclipse | Arduino/Raspberry Pi concepts | HIL environments

## EXECUTIVE CONTRIBUTION SUMMARY

Disciplined manual testing, AI behavior evaluation, engineering judgment, clear defect communication, documentation habits, and visual organization of product knowledge.
